## **KARNI PACKAGING PRIVATE LIMITED**

Date of Incorporation: 09<sup>th</sup> March 2006.

Place: Hyderabad.

### **CORPORATE ASTROLOGY- An Introduction:**

Growing a tree? You need:

- i) Seeds
- ii) Adequate Sunlight
- iii) Good Soil
- iv) Adequate Water &
- v) Suitable Atmosphere.

All the above combined factors are needed for growing a healthy tree. If any of the factors are missing say for example adequate sunlight or water, apparently the tree will not grow healthy or may not even grow. Practically, this is not possible where all the factors are present in the right mix. For example, we have no control on the climate & soil but with the nature. For this reason, **Fertilizers & Nutrients** are used to cover up the deficiencies & boost the growth of healthy trees.

A Company grows just like a tree. For its functioning you will primarily need:

- i) Right Strategies in place &
- ii) Adequate resources required for its implementation.

But, for achieving consistent growth & success you need something more that is not directly in your control but of the Cosmic power what we generally believe as 'Destiny'. Just as in the case with growing trees, our analysis & remedies acts as fertilizers & nutrients for the growth of your Company

### **How does this work?**

The invisible Cosmic energies known as the planetary effects intervene & controls our day to day activities and we experience the results accordingly which may be positive or negative depending upon the planets.

If you enhance the positive vibrations of favourable planets & reduce the negative effects of the malefic planets on you & your company, you can be assured of success in your endeavours.

Let us analyse & discuss these factors in details:

##### I. **ASTRO-STRATEGIC PLANNING**

**Strategic planning** is an organization's process of defining its strategy, or direction, and making decisions on allocating its resources to pursue this strategy. It involves setting goals, determining actions to achieve the goals, and mobilizing resources to execute the actions. A strategy describes how the ends (goals) will be achieved by the means (resources).

**By the help of Astro-numero analysis** we can give a favourable name to the company, identify and define specific opportunities and threats of the company in the market environment and define the company's vision, mission and strategy.

##### 1) **NAME OF THE COMPANY & ITS IMPORTANCE:**

The Name of the Company has to be compatible & favourable to its date of incorporation i.e. its date of birth as well as its key promoter & director according to Astro-Numerological principles as it plays a very important role in the success of the enterprise. A favourable name is capable enough to turn around the company's prospects and lead to its success. Similarly an unfavourable name can spell misfortune & disaster especially when the time is going unfavourable. The positive vibrations of a favourable name can reduce/remove obstacles and help the company combat through its tough times.

For example: 'Reliance Industries Limited' having Name Number 9 is quite favourable to Late Dhirubhai Ambani as well as Mukesh Ambani. Their Info Communication Company 'JIO' is again having 9 as its Name Number.

**"KARNI PACKAGING PRIVATE LIMITED"** according to Astro-numerological principles, the primary number is 9 and the Name number is 6. The number 9 is ruled by the planet Mars which indicates Force, Aggression, Courage, Ambition, Leadership qualities & Domination.

The number 6 is ruled by the planet Venus which indicates Talent, Artistic abilities, Imaginative & Relationship oriented.

This combination is very good as it gives a balanced approach towards its activities which is most important for its success.

**The name number is compatible and attracts its primary number. Therefore the name is auspicious hence no alteration is required.**

**You can also use 'KARNI PACKAGING PVT LTD'. (Name Number 4).**

The alphabet 'K' inspires a trustworthy nature. Your sensitivity tends to override everything. You have a built in need to be appreciated. You anticipate and expect rewards.

Early years may be full of struggle but you attain success in the end. Lot of hidden enemies but will not be able to encounter you directly and will always try to damage you from behind.

## **2) DEFINING VISION & MISSION OF THE COMPANY:**

Your **Vision Statement** is your inspiration, of what an organization would like to achieve or accomplish in the mid-term or long-term future. It's the framework for all your strategic planning.

**KARNI PACKAGING PVT LTD** Vision statement is defined as under:

### **VISION**

"To serve the consumers across the globe by continuously developing and creating value added packaging solutions and be a major player in the global packaging market empowered with ethical values, innovation, quality, technical support, operational excellence, international best practices and world class competitive strengths".

Your **Mission statement** defines the organization's purpose and primary objectives. These statements are set in the present tense, and they explain why you exist as a business, both to members of the organization and to people outside it. Mission statements tend to be short, clear and powerful. The Company's Mission Statement is defined as under:

### **MISSION**

"To create innovative and environmental friendly packaging solutions and deliver value to our customers, employees and society at large".

Vision & Mission of the company should be defined keeping in mind our goals, potentiality, strengths, weaknesses, opportunities, threats & economic environment where we function.

By the help of Astrology we can deeply analyse and define the company's road map and strategically plan to work on it which shall lead the company to achieve the desired growth and prosperity.

## II. **ASTRO-BRANDING**

Branding is one of the most important aspects of any business, large or small, retail or B2B. An effective brand strategy gives you a major edge in increasingly competitive markets. But what exactly does "branding" mean? Simply put, your brand is your promise to your customer. It tells them what they can expect from your products and services, and it differentiates your offering from your competitors'. Your brand is derived from who you are, who you want to be and who people perceive you to be.

**Astrology has a key role in making the right selections for implementing its branding strategies, which includes:**

- a) An effective Brand Name
- b) Right Colour combinations
- c) Powerful Logo
- d) A great Tag line for the Company.

### 3) **BRAND NAME:**

A brand name is a name used to distinguish one product from its competitors. It can apply to a single product, an entire product range, or even a company e.g. Tata, Apple, Sony etc. Your brand name is one of the most powerful brand signals that you can own therefore it should be carefully articulated as gives an identity & recognition to the company in the outside world. E.g. People recognise Johnny Walker as a popular brand name but may not know its parent company Diageo.

BRAND NAME to be powerful & favourable has to be compatible according to Astro-numerological principles. "KARNI" having Name number 2 is quite compatible to its Company name and also its key Directors primary numbers. As explained earlier, being the name of a deity, the name has positive vibrations and therefore as your BRAND NAME, it is quite powerful & favourable.

#### 4) COLOUR COMBINATIONS:

Colours are an important component of your business be it in its name, logo, other business promotion materials and your business website. Right combination of colours that are suitable and favourable to you helps you succeed in your activities and unfavourable colour combinations can act as an obstacle in its growth path.

For example: 'Airtel' uses Red representing the planet Sun as prominent colour for branding as it is favourable to the Company & its Promoter & CEO Mr. Sunil Bharti Mittal.

Colours also have strong emotional associations too. Red, for instance, is an aggressive colour; its fiery elements are associated with speed, excitement and passion while green is a calming colour associated with growth, renewal and nature.

**'KARNI PACKAGING PRIVATE LIMITED' Astro-numerological analysis suggests,** Red, Green, Gold, Yellow & White are favourable colours for you. Use them prominently in Names, Logos & Back grounds.

Avoid Navy Blue, Brown, Purple & Black. However you can only use them as font colours.

Rest all the other colours are neutral therefore can be used in minor areas as the situation demands.

#### 5) COMPANY LOGO:

A Business Logo appears on all of the company letterhead, communications, marketing and advertising pieces of a business as a graphic representation or symbol for the company. Essentially, the Logo is typically the first thing a reader may notice before reading the text. Logos help in the creation of a brand identity for a company or business because the primary functions of a Logo are to inspire trust, recognition and admiration for a business or product. A Logo must be simple, memorable, timeless, appropriate and versatile, but at the same time conjure up the feeling you want your target audience to associate with your business.

A good Logo design displays the overall essence of the business. It portrays a business that is positive, professional, stable and reliable. The Logo promotes awareness of the company and allows the company to stand out from other similar companies. It presents the values and services of the business in a memorable visual image. In essence, when someone sees the company Logo, it should conjure up the appropriate feelings about the business or its products or services.

A good Logo should be designed keeping in mind the suitable shapes & angles, colour combinations which are favourable to the company and its visual nature.

A badly thought up Logo can very easily destroy the image of the company due to its negative vibes. On the other hand, a carefully designed Logo can reach out well to your target audience and communicate to them the worth of your company or product. Therefore, everything depends on the design and vibrations of your Logo. Let us analyse our current Logo and the new logo:

### **The Old/Current Logo**

The current/old Logo is a combination of Green & Red where the name is boldly written in Red. The colour Red used majorly is quite favourable and gives a bold character to its name. The colour green gives a sense of environmental friendly and adaptability in its nature.

The colour combination is compatible but the colour combination has to give a strong character to the Company along with being favourable for its growth and success.

The Logo should also look firm instead of its drooping shape. Therefore it is strongly advised to make the necessary changes in the logo and the re-designed Logo is shown below:

### **The New Logo**

The new logo is designed on the Vedic principles choosing the right shape, favourable colour combinations and suitable font size that shall contribute towards the company's positive growth story. A combination of Red and Blue gives a perfect vibration of a corporate environment. The colour Red stands for stability & firmness and gives a strong character to the company and the colour Blue stands for strategic planning & corporate culture giving it a refined corporate feel.

## 6) TAGLINE OF THE COMPANY:

A great Tagline is a powerful tool that can help consumers, customers, suppliers, and other interested audiences link your company or product name to a brand promise and message.

After a brand name or company name, the Tagline is often the second most noticeable element.

A great Tagline can:

- Enhance the brand promise
- Inspire you to learn more about the brand or company
- Differentiate the brand or company from the competition
- Create an emotional bond

A favourable Tagline has to be Astro-numerologically compatible to the name of the company. The Tagline created by us for your Company which is Astro-numerologically compatible:

COMPANY'S TAGLINE: "**Crafting Your Imagination**" Name Number 4 which attracts the primary number of the Company.

## III. ASTRO-MANAGEMENT

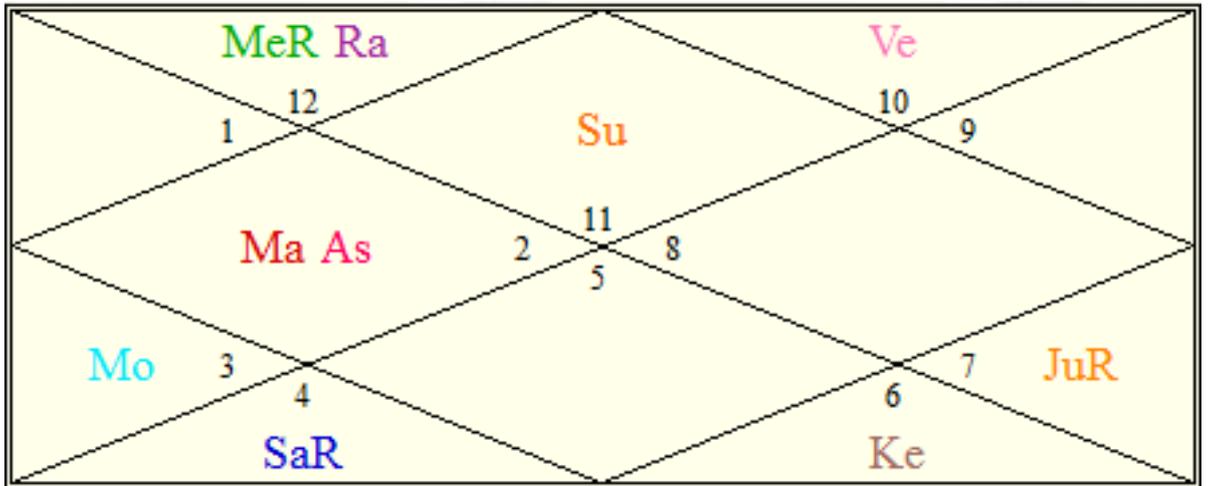

The person or persons controlling and directing the affairs of an organisation are the ones who are mainly responsible for its growth and prosperity. Here, Astrology plays its most important role, as from astrological point of view every corporate entity is ruled by various individuals which includes the CEO or Managing Director. Along with the Company's Natal Chart, proper analysis of the horoscopes of the key Promoters & Directors become of utmost importance for its smooth running, operations and growth prospects. It will help us in identifying the areas of investment and selecting the line of activity. This is very important for the success of the project.

## 7) NATAL CHART OF THE COMPANY:
